Sweden would like to have some Observables for (mostly histo-) pathology added to International.

In the [Cancer Synoptic Reporting Clinical Project Group](https://confluence.ihtsdotools.org/display/~dkarlsson)² there has been efforts to develop content to support using SNOMED CT. Part of that work has resulted in a number of SNOMED CT Observable entities currently maintained in a University of Nebraska Medical Center owned module. The Swedish NRC is considering adding the module to the Swedish extension, but if there are more countries interested, we could jointly make a request for the content to be added to the International edition.
